

NORTHWEST BRITISH COLUMBIA
RESOURCE BENEFITS ALLIANCE

**Shared Resources.
Stronger Communities.**

The Northwest BC Economic Vision: Sustainable Growth, Sustainable Communities

- Northwest BC communities lack the infrastructure and services that make most other BC communities sustainable, including well-maintained roads, updated sewer and water systems, as well as programs and facilities for arts, culture and sports.
- Major projects, like mines and clean energy infrastructure, put pressure on local government services but generate little local government revenue.
- That is why we are engaged with the provincial government to create a funding deal that will ensure benefits from economic development in the region are reinvested to create sustainable, livable communities for our future generations.

Support the RBA by speaking to your MLA about the need for this funding agreement to be successfully concluded.
